

Sustainability Policy

1. Overview

- 1.1. Renascor Resources Limited (Renascor) is committed to applying sustainability principles in every aspect of our business. We will achieve this through developing and implementing Environment, Social and Governance (ESG) management systems which focus on continuous improvement.
- 1.2. Renascor's core business is to provide a critical mineral (graphite) to Australia's international trading partners to support the long term growth of battery storage alternatives and help reduce carbon emissions from traditional energy sources.

2. Key Commitments

- Ensure the highest levels of health, wellbeing and safety of our workforce and the community.
- Responsible stewardship of resources, including land, water, air, energy and biodiversity within the local communities in which we operate.
- Contribute to action on climate change by considering options to reduce our carbon and GHG emissions and managing climate related risks.
- Comply with relevant laws, regulations and standards relating to sustainability in the jurisdictions where we operate.
- Responsible procurement of equipment, services and materials, aiming to source locally where possible.
- Contribute to the circular economy by minimizing waste and implementing reuse and recycling.

3. Review of Policy

- 3.1. This Policy will be reviewed regularly by the Board having regard to the changing circumstances of the Company and any changes to this Policy will be notified to affected persons in writing. Personnel should communicate all comments and concerns about this Policy to the Company Secretary.
